➤ ABOUT BLACK CAT® JSC

Black Cat® Insulation Technical Joint Stock Company officially became a public company on October 21, 2024, under the stock code BMK. The Company is one of the pioneering contractors in the scaffolding and insulation sectors in Vietnam and across Southeast Asia.

Since transitioning its business model in 2011, the Company has continuously expanded and strengthened its capabilities in the following areas: insulation, scaffolding, painting and anti-corrosion, passive fire protection, refractory, and steel solution supply.

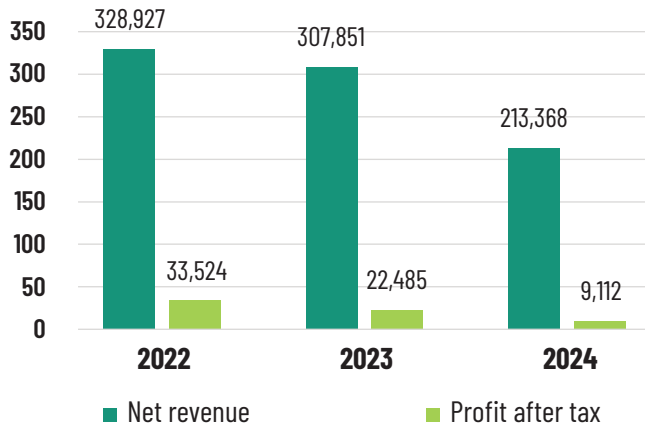

Headquartered in Dong Xuyen Industrial Zone, Ho Chi Minh City, Vietnam, the Company has participated in numerous large-scale projects within the oil & gas, energy, and industrial sectors. With a strong commitment to safety-first execution, the application of advanced technologies, and full compliance with international standards, the Company has built a solid reputation among more than 500 clients and international EPC contractors. Guided by sustainable development goals, the Company strives to become an outstanding contractor in every project it undertakes.

➤ VISION - MISSION - CORE VALUES

» VISION

To become one of the leading industrial service providers in Vietnam and Southeast Asia, while serving as a trusted global partner in advanced insulation solutions and cryogenic technologies.

» MISSION

To deliver high-quality, safe, and efficient industrial services, creating sustainable value for clients, shareholders, and the community.

» CORE VALUES

➤ SAFETY & QUALITY

We place safety and quality as top priorities in every project, ensuring reliable outcomes for clients and all stakeholders.

➤ SUSTAINABLE DEVELOPMENT

We are committed to promoting sustainable development across all activities - from products and services to operational and business processes.

Our goal is to deliver solutions that create positive impacts on the environment, society, and economy.

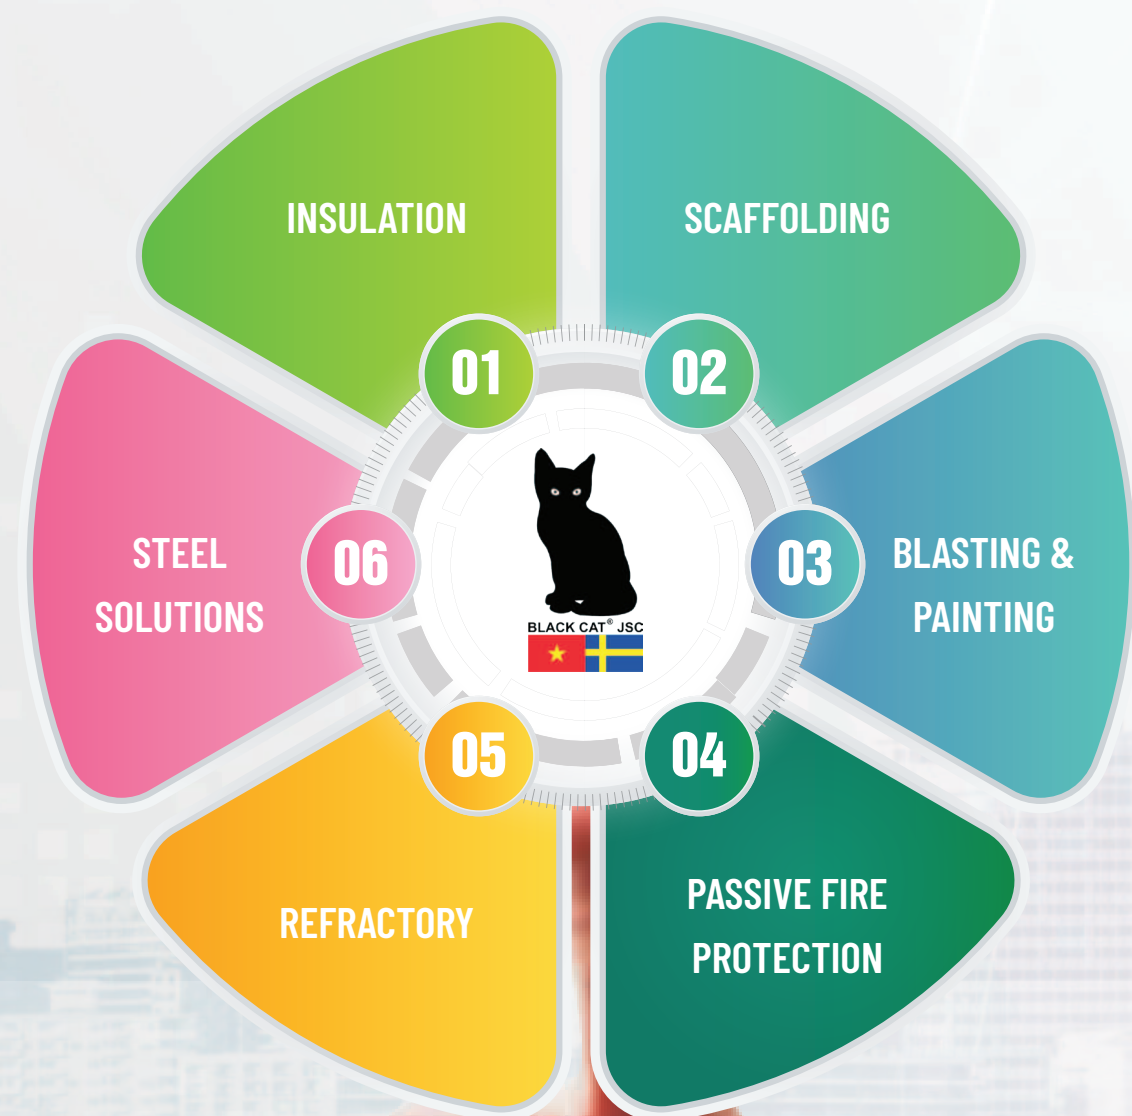

➤ TECHNICAL CAPABILITY

We continuously invest in technology, facilities, and human resources to deliver innovative and effective engineering solutions.

➤ FAIRNESS, TRANSPARENCY & ACCOUNTABILITY

We operate with transparency, uphold accountability, and fulfill our responsibilities as a public company.

INSULATION SERVICES

With many years of industry experience, Black Cat® JSC has established itself as a reputable contractor in the insulation sector, delivering projects across Vietnam and international markets. The Company is recognized for its strong commitment to safety, quality, reliability, and durability in every project undertaken.

We provide professional insulation services for construction projects and industrial plants, contributing to optimized energy efficiency and thermal performance while enhancing fire and explosion safety and supporting clients' sustainable development objectives.

The Company offers a comprehensive portfolio of insulation solutions, including material selection, fabrication, manpower supply, and installation services for piping systems, ductwork, boilers, pressure equipment, and storage tanks/vessels. Our solutions are designed to meet a wide range of operating temperatures, from low-temperature applications to high-temperature systems, including cryogenic insulation. In addition, the Company continuously adopts advanced materials and innovative installation technologies to optimize performance and reduce the total lifecycle cost of projects.

INSULATION MATERIALS

AUTHORIZED DISTRIBUTOR OF WORLD-LEADING BRANDS IN VIETNAM

FABRICATION INSULATION MATERIALS SERVICES

Black Cat ® JSC provides fabrication services for pre-formed insulation materials, custom-manufactured to meet the technical requirements of each project, including equipment insulation, pipe and pipe fittings: elbows, tees, valves, and other components. This service ensures precision and consistency, shortens on-site installation time, and enhances thermal insulation performance.

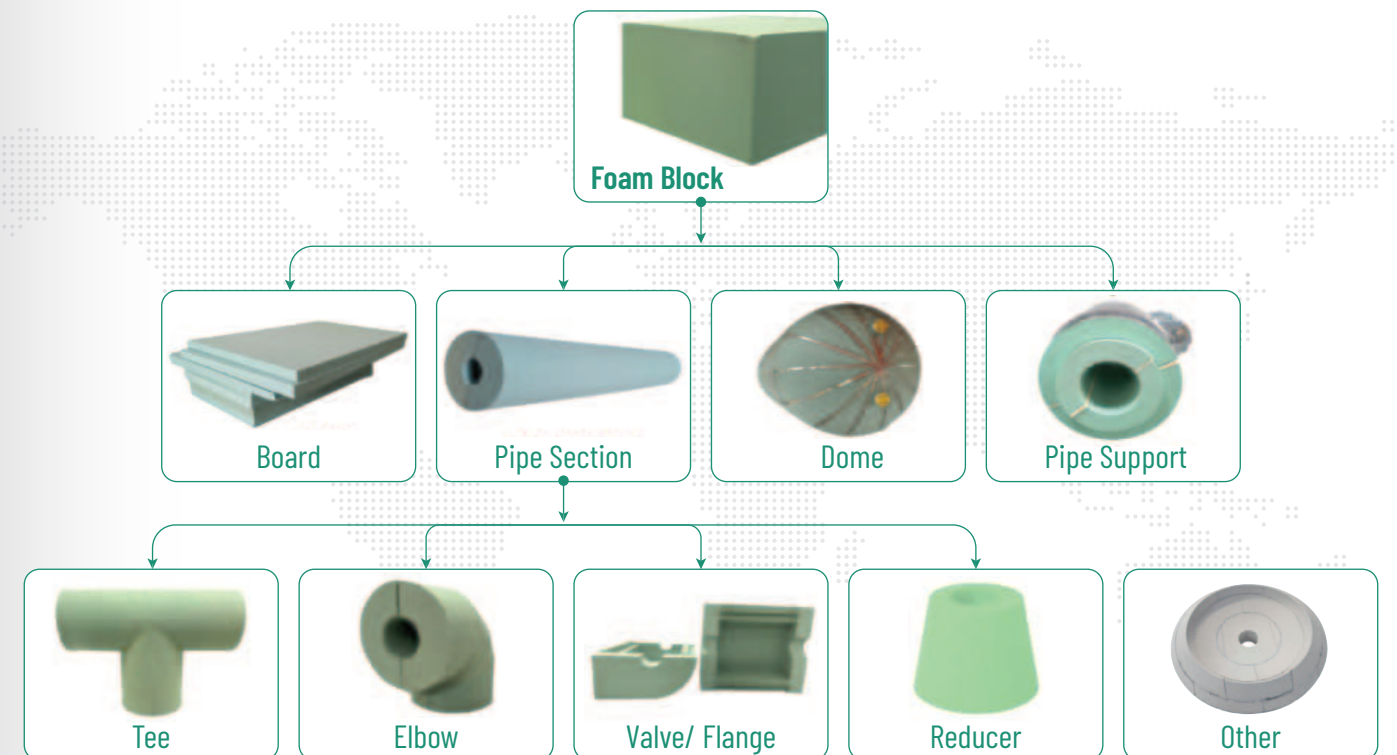

In addition, the Company has successfully developed and registered the trademarks for two product lines, KingCat® and RockCat®. KingCat® is manufactured from polyisocyanurate (PIR) insulation material; RockCat® is manufactured from stone wool insulation material. These two product lines have been developed to meet stringent requirements for thermal insulation performance, durability, and applicability across a wide range of industrial facilities.

PRE - FORMED INSULATION MATERIALS

Black Cat ®JSC provides fabrication services for insulation materials from insulation blocks such as PIR - Polyisocyanurate, Phenolic, Stone wool, and Cellular Glass. These products are precisely engineered to meet the exact dimensions and requirements of each specific installation item. The fabrication process is carried out using state-of-the-art CNC machining systems, based on technical drawings and applicable industry standards, ensuring high precision, consistency, and superior finishing quality.

Pre-formed insulation products significantly reduce on-site installation time, minimize construction errors, and optimize thermal insulation performance. In addition, they enhance aesthetic quality and improve cost efficiency across the entire project lifecycle.

FABRICATION METAL CLADDING

01

02

03

Increased productivity.

Improved quality.

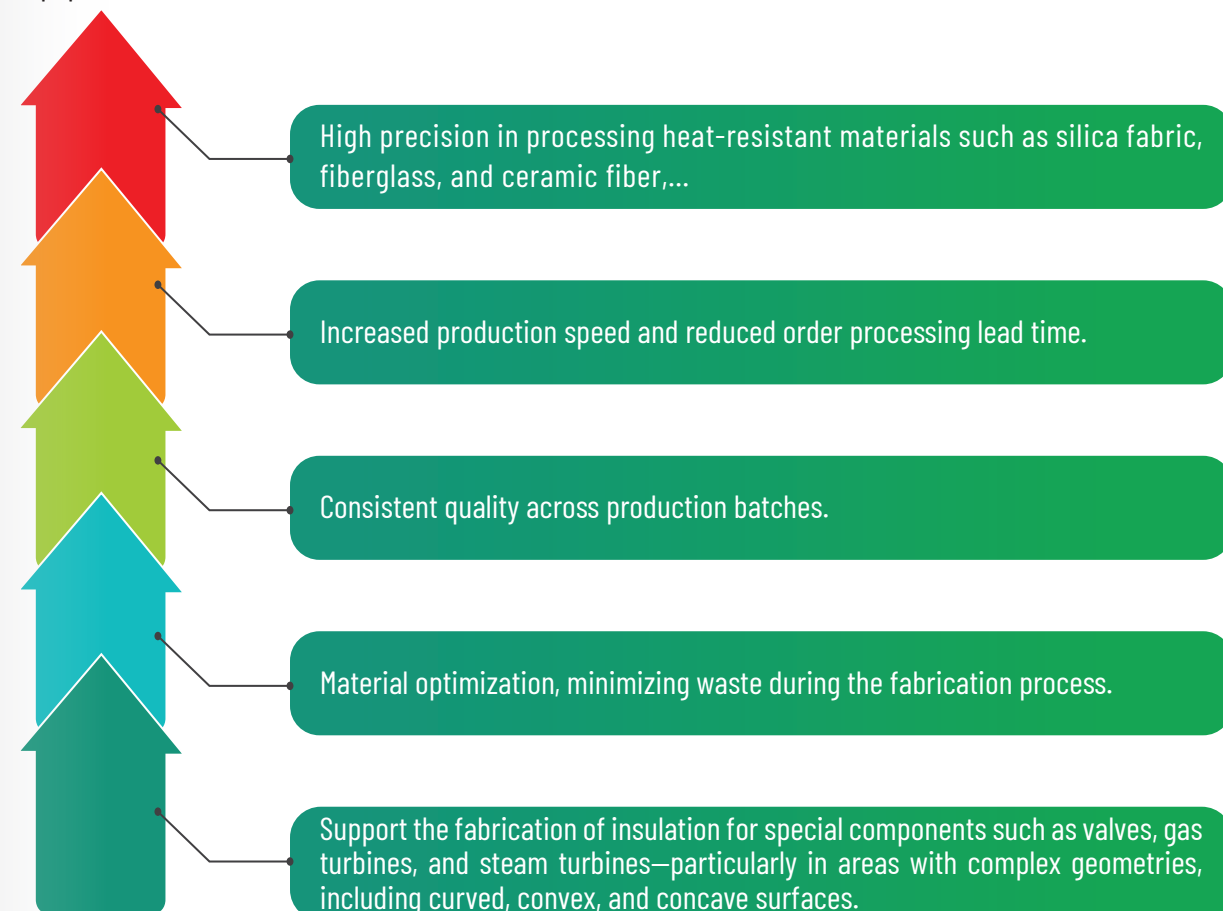

Reduction of material consumption
by 50%

FABRICATION REMOVABLE INSULATION PILLOW

Use dedicated CNC laser cutting machines for fabric processing, enhancing production capacity, and ensuring readiness to meet projects with high technical requirements in the industrial insulation sector. This solution shortens installation time on site while ensuring product stability throughout the entire operational of the equipment.

INSULATION INSTALLATION

Black Cat ®JSC has a well-trained team of insulation specialists with strong technical expertise and hands-on experience in industrial insulation works. With a foundation in installation engineering, materials, and safety procedures, we provide high-quality one-stop insulation solutions for a wide range of projects across various sectors, including: Energy, Oil & Gas, Brewery and Beverage, and Cold Storage...

Our installation teams receive regular direct training from insulation material manufacturers, ensuring continuous updates on the latest technologies and industry standards. The Company is capable of rapidly mobilizing a large workforce within a short timeframe, fully meeting project schedules and execution requirements for large-scale developments.

REFERENCE PROJECTS

ONE-STOP INSULATION SERVICES PROJECTS

Long Son Petrochemicals Enhancement Project (LSPE)

- Client: PTSC Quang Ngai
- Industry: Petrochemical
- Location: Long Son, HCMC, Vietnam
- Year: 2026 - 2027
- Scope of Work: Supply of materials and insulation installation
- Materials: PIR, Metal cladding

Long Son Petrochemical Complex Project

- Client: TPSK / PTSC
- Industry: Petrochemical
- Location: Long Son, HCMC, Vietnam
- Year: 2019 - 2023
- Scope of Work: Supply of materials and insulation installation (Hot & Cold: -200°C to 1250°C)
- Materials: PIR, FOAMGLAS®, Rockwool, Aerogel, Superwool

Long Son Petrochemical Complex Project

- Client: Hyundai Engineering Co., Ltd
- Industry: Petrochemical
- Location: Long Son, HCMC, Vietnam
- Year: 2020 - 2022
- Scope of Work: Supply of materials and hot insulation installation
- Materials: Rockwool, Superwool, Metal cladding

LNG Thi Vai Terminal Project

- Client: Samsung C&T/PTSC
- Industry: Oil & Gas
- Location: Phu My, HCMC, Vietnam
- Year: 2021 - 2022
- Scope of Work: Supply of materials and cryogenic insulation installation
- Materials: PIR, FOAMGLAS®, Metal cladding

- Materials: Metal cladding, PIR

Fabrication and Export Project

- Client: PNK Engineering Co.Ltd
- Industry: F&B
- Location: Korea
- Year: 2024/ 2025
- Scope of Work: Fabrication insulation materials
- Materials: Cold pipe support

Fabrication and Export Project

- Client: Inventive Designs Ltd
- Industry: Fabrication and export
- Location: New Zealand
- Year: 2025/ 2026
- Scope of Work: Fabrication insulation materials
- Materials: Metal cladding, Rockwool, PIR

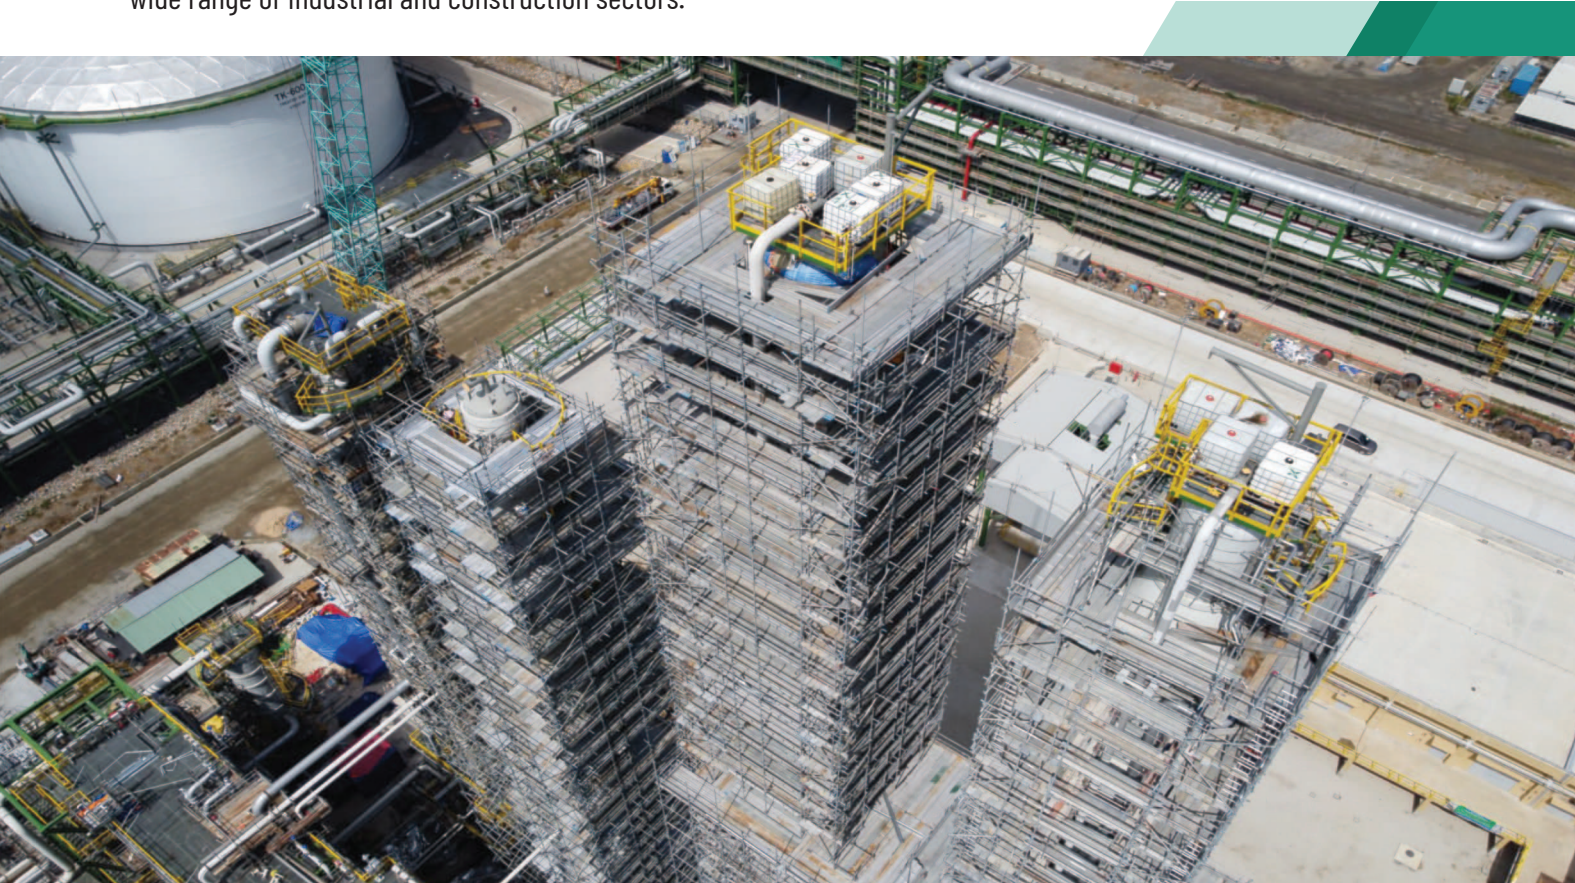

Fabrication and Export Project

- Client: CERECARE
- Industry: Fabrication and export
- Location: France
- Year: 2025
- Scope of Work: Fabrication insulation materials
- Materials: Phenolic

SCAFFOLDING SERVICES

Black Cat ®JSC currently maintains more than 3,000 tons of scaffolding materials, including tube-and-coupler systems manufactured in accordance with BS 1139/ EN 74 standards, readily available in stock. This enables rapid and flexible deployment for both domestic and international projects, supported by a professionally trained team of scaffolding supervisors and scaffolders. Black Cat ®JSC is one of the leading scaffolding service providers in Vietnam, serving a wide range of industrial and construction sectors.

We provide comprehensive scaffolding services, including technical consultation, planning, design, erection, inspection, and dismantling. Our structural engineering team performs scaffold design, risk assessments, and method statement development prior to execution to ensure safety, efficiency, and cost optimization for each project.

Black Cat ®JSC is committed to becoming a trusted scaffolding service provider in Vietnam while maintaining the highest standards of quality and safety. With a professionally trained workforce and highly skilled personnel, we are proud to be a partner of leading EPC contractors and major industrial companies such as PTSC, Hyundai Engineering, Lotte E&C, Jurong Engineering Limited, TTCL, and Doosan Heavy Industries,...

- Scope of Work: Supply scaffolding Tower, Hanging, Cantilever
- Materials: BS 1139/ EN74

BLASTING & PAINTING SERVICES

Black Cat ©JSC provides surface treatment- blasting, painting, and anti-corrosion coating services with a highly experienced workforce, supporting clients in selecting appropriate cleaning methods and surface preparation solutions in accordance with the technical requirements of each project scope. Proper surface preparation in compliance is a critical factor in ensuring the quality and long-term durability of all coating and protective lining systems.

We provide a wide range of services, from conventional applications to specialized technical requirements, including anti-corrosion coating for steel structures, storage tanks, heavy industrial equipment, and concrete, as well as the application of specialized protective coating systems. Supported by skilled and professionally trained personnel together with dedicated equipment, we ensure safe and efficient execution while minimizing shutdown for our clients.

- Year: 2016 - 2017
- Scope of Work: Blasting and Anti-corrosion Painting

PASSIVE FIRE PROTECTION SERVICES

Black Cat ®JSC provides Passive Fire Protection (PFP) services, backed by extensive experience and technical expertise in the supply and application of passive fire protection systems for structural steel in industrial and energy facilities. We support our clients throughout all project phases, from planning and engineering to installation and commissioning, including technical consultation, product selection, provision of technical documentation and certification, site surveys, installation guidance, and maintenance support.

Black Cat ®JSC delivers comprehensive fire protection solutions utilizing a wide range of advanced PFP technologies, including fireproofing boards and sheets, cementitious and fibrous spray/trowel-applied fireproofing systems, intumescent coatings, and PFP flexible jacket systems. These solutions are applied to structural steel, risers, valves, actuators, instrumentation devices, storage tanks, piping systems, and cable trays in designated fire-rated areas.

Our engineering and installation teams are professionally trained and certified under manufacturer-approved programs, qualified to work with a broad range of PFP materials available on the market. We are committed to delivering the highest standards of safety, quality, and long-term operational reliability for every project.

REFRACTORY MATERIAL SUPPLY AND INSTALLATION SERVICES

Black Cat ®JSC provides refractory products and refractory installation services for furnace systems, thermal equipment, and industrial applications. Our scope of work includes engineering consultation and material selection, supply of a full range of refractory materials, demolition of existing linings, as well as refractory repair and maintenance services tailored to project requirements.

We also perform refractory dry-out, commissioning, start-up, and handover services, while optimizing refractory lining solutions for each specific operating condition and application.

All refractory projects are subject to quality control in accordance with APQ procedures, with certified personnel working in compliance with manufacturer requirements and API 936 standards, ensuring safety, durability, and long-term operational performance.

STEEL SOLUTIONS

Black Cat ©JSC provides Steel Solution Services through Innovative Steel Solutions JSC (ISS), a specialized company providing comprehensive and innovative steel solutions for industrial and construction projects.

The scope of services includes metal fabrication and structural welding, supported by an in-house engineering team responsible for structural design, engineering analysis, and prototype development in accordance with project requirements. Production processes such as cutting, bending, welding, and steel structure assembly are carried out under strict quality control procedures to ensure accuracy, safety, and installation efficiency.

ISS complies with ISO 3834-2 - Quality requirements for fusion welding of metallic materials – Part 2: Comprehensive quality requirements, applicable to complex welding processes and projects requiring high weld reliability in industries such as structural steel, energy, oil & gas, and shipbuilding.

STEEL FABRICATION

Steel fabrication services play a vital role in the construction of safe and precise steel systems and structures for a wide range of industrial sectors. The fabrication process includes CNC cutting, bending and forming, welding, and assembly for the manufacture of items such as cryogenic pipe supports, cranes, storage tanks, and HVAC systems

By applying internationally recognized management and quality control standards, including ISO 9001:2015, ISO 3834-2 and ISO 14001, our turnkey projects are executed to the highest standards of quality, safety, and operational efficiency.

Design, calculation, and fabrication of insulated steel cold pipe supports (Cold pipe supports)

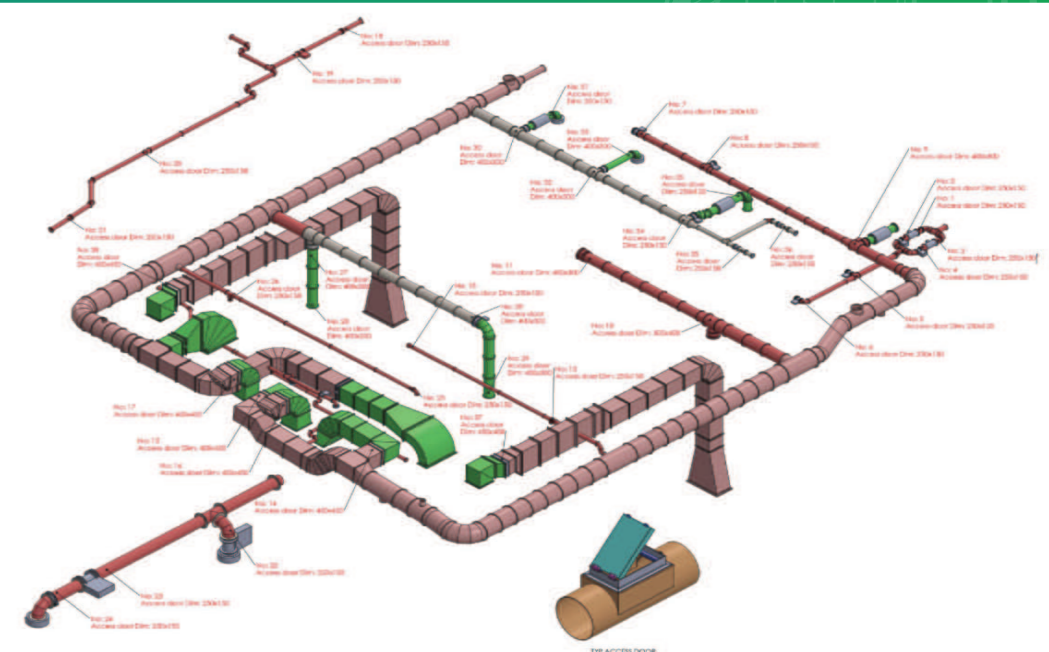

Design and fabrication of cranes

HVAC system design, fabrication, and installation

Fabrication of high-pressure vessels and industrial storage tanks

Manufacturing Facilities at Dat Do Industrial Park

QUALITY MANAGEMENT SYSTEM

Black Cat® JSC has implemented an Integrated Management System in accordance with international standards to ensure service quality, occupational health and safety, and environmental protection across all company operations. This system is established, implemented, and maintained in compliance with the following standards:

ISO 9001:2015
Quality Management System

ISO 14001:2015
Environmental Management System

ISO 45001: 2018
Occupational Health and
Safety Management System

The implementation of ISO standards enables Black Cat® JSC to effectively control its operational processes, enhance service quality, minimize health, safety, and environmental risks, and meet the stringent requirements of domestic and international customers and partners.

COMMITMENT TO HSE & QUALITY

01

Zero serious occupational accidents.

02

Protect the physical and mental health of all employees.

03

Minimize adverse environmental impacts to the greatest extent possible.
